

WACLOUD API Documentation

Send Message API Endpoint

POST <https://api.wacloud.app/send-message>

Description

This API allows you to send messages via WhatsApp using the specified device.

Authentication

To access this endpoint, include the API key in the headers:

API-Key: YOUR_API_KEY

Request Parameters

Parameter	Type	Required	Description
recipient	string	Yes	The recipient's phone number (e.g., `88017*****`).
content	string	Yes	The content of the message.
media_url	string	No	The URL of the media to send. Leave blank to send as text.
instance_id	string	Yes	The ID of the device to use for sending the message.

Example Request

```
{  
  "recipient": "88017*****",  
  "content": "Hello from the WhatsApp API",  
  "media_url": "https://example.com/yourmedia.pdf",  
  "instance_id": "QRLKQ28*****"  
}
```

Response

Success Response

```
{  
  "success": true,  
  "message": "Message sent successfully!",  
  "code": 200  
}
```

Error Response

```
{  
  "success": false,  
  "message": "Failed to send message.",  
  "code": 400  
}
```
